

Selected to provide gastro and immune support when needed most

During a lifetime, the human body sometimes needs some extra care and support. In periods of intense training, antibiotic treatment or illness as well as in the process of ageing, we are put under stress and may need help to stay healthy or to recover. Probi Plantarum 6595 has been selected for its gastro and immune supporting properties for when the body needs it the most.

Proposed positioning

Supports Gastro & Immune health

Supports general health for people with a compromised immune system

Health benefits

Reduces the risk of infection and inflammation

Reduces gut permeability and translocation

Supports immune defense in sensitive groups, such as athletes, elderly, and during illness

Short facts

Strain: *Lactobacillus plantarum* DSM 6595

Origin: Human intestinal mucosa

Documentation: Multiple preclinical and clinical studies

Recommended daily dose: minimum 10⁹ CFU

Safety: Generally recognized as safe, QPS status, extensively tested in ICU and in immune compromised patients

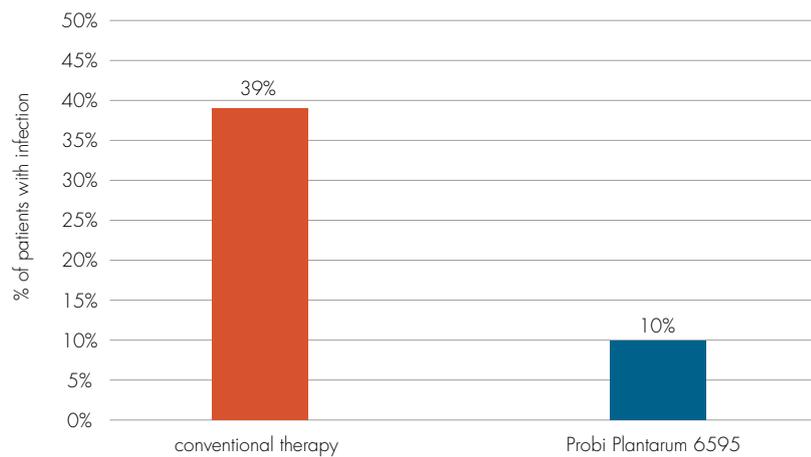

Different solutions for different needs – product application ideas

Ideal for smoothies, shakes or drinking yoghurt within the functional food area, or as a dietary healthcare supplement such as capsules or tablets.

Patented and clinically documented by Probi

Probi Plantarum 6595 has been shown to exert anti-microbial activity against pathogenic species and provide anti-inflammatory effects in people with compromised immune system. Reduced risk of infection may contribute to faster recovery and support general health.

Treatment with Probi Plantarum 6595 significantly reduces the risk of infection in immunocompromized individuals

Results from 3 placebo-controlled clinical studies in patients undergoing abdominal surgery

Probi Plantarum 6595 survives in the human gastrointestinal tract and reduces gut permeability and translocation. Several studies have shown that treatment with Probi Plantarum 6595 supports immune defense and significantly reduces the risk of infection and inflammation.

The Probi Select range consists of carefully selected probiotics, patented and clinically documented by Probi. Designed to bring competitive health benefits to broad target groups thanks to high standards of performance and viability. A selection from where relevant health benefits can be addressed in a variation of attractive consumer products.
